Applicant respectfully requests under 37 CFR 1.97 (c) that the art cited in this Information Disclosure Statement (IDS) be considered by the Examiner, and made of record.

A copy of the foreign patent GB 2 333 495 and of the Patent Abstracts of Japan for JP 09-135481, as listed on the Document Listing of Enclosure (1), are enclosed as Enclosures (3) and (4), respectively. The Patent Abstracts of Japan for Japanese patent publication JP 09-135481, Enclosure (4), is cited in the International Search Report for International Application PCT/US 03/00755, (which has been published WO 03/063076 on July 31, 2003), and is submitted herewith as Enclosure (5). While Enclosure (5) shows reliance on the Abstract of the Patent Abstracts of Japan document, Enclosure (4) includes four sheets of drawings and a computer translation of JP 09 135481 of 20 May 1997 since that material was available from the Japanese Patent Office web site.

With respect to the listed U.S. patent 6 ,812, 841, a German patent DE 39 07 519A published September 20, 1990 is cited as of record in that patent, but is not enclosed herewith. Instead, a counterpart U.S. Patent 5, 283, 529 issued February 1994 is listed on the attached IDS Document Listing of Enclosure (1). The German patent DE 39 07 519 A is listed as a category A reference on the International Search Report for PCT 03/00755, Enclosure (5), but the third page of Enclosure (5) shows US Patent 5,283,529 to be in the same family.

The publication reference of the IDS Document Listing of Enclosure (2) is Enclosure (6) hereof.
